

Letter of Congratulations to 3rd Annual Deepwater Asia Pacific 2010 Convention

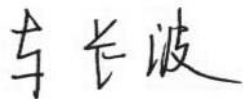

To: Organizing Committee of Deepwater Asia-Pacific 2010 Convention

With two year successful experiences, the series of Deepwater Asia Pacific Convention has blossomed to be one of the most important platform in the field of the deepwater oil and gas industry in Asia Pacific depending on the in-depth conference program, most authoritative speakers and bustling atmosphere.

Facing the current scarcity of the onshore energy resources, the E&P of offshore energy resources, especially the deepwater oil and gas resources, has drawn the globally great mass fervor. Asia-Pacific area as one of the hottest areas with giant deepwater oil and gas reservoirs and the major base of the marine engineering manufacturing industry is blooming quickly. Therefore, the offshore oil and gas industry of Asia-Pacific is facing the opportunities and challenges which taken by the technology innovation and advanced marine equipments manufacturing.

With this mind, after the previous twice Deepwater Asia-Pacific conferences, The 3rd Annual Deepwater Asia Pacific 2010 Convention is going to stage from Nov. 8th to 11th in Shanghai China. This convention has generated a timely and strategic three-day conference and three-day exhibition to all of our participants for creating intellectual fizz and closing business relationship. From this convention, the decision makers, academic experts and industry leaders will analyze the latest deepwater improvement policies, update the ravishing projects in the important blocks, unscramble the next wave of market trend coming up, open up the new frontier of technology innovation and support the whole value chain exchange opportunities to all of our participants.

I, on behalf of Strategic Research Center of Oil & Gas from Ministry of Land & Resources, wish to extend my warmest congratulations to this upcoming high-profile event for what will be a most rewarding and compelling event in deepwater exploration and production.

CHE Changbo
Deputy Director General
Strategic Research Center of Oil and Gas
