Letter of Congratulations to Green Mobility 2010

August 17th, 2010

To: Organizing Committee of Green Mobility 2010

With previous successful experiences of China Synfuels Summit, Green Mobility 2010- one of the series of CDMC's global energy events- is determined to be one of the most important platform in the field of the green fuels and vehicles industry in Asia Pacific depending on the in-depth conference program, most authoritative speakers and bustling atmosphere.

Now in China, the automotive industry is about to enter a new era: the revolution of energy. The new era of green vehicles calls for a new way to distinguish noteworthy vehicles. The economic, regulatory and technological advantages of electric vehicles, plug-in hybrid electric vehicles and fuel-cell electric vehicles mean that the dramatic growth in their adoption and usage will be seen over the next decades, both in China and worldwide. It is necessary to get on the cutting edge of current and future electric transportation, battery development and other components technologies for mass production while understanding the policy of electric utilities and infrastructure construction.

With this mind, Green Mobility 2010 is going to stage from Nov. 11th to 12th in Shanghai China. This conference has generated a timely and strategic two-day conference to all of the participants for creating intellectual fizz and closing business relationship. From this conference, the decision makers, academic experts and industry leaders will analyze the latest green vehicles policies, update the ravishing projects in the important regions, unscramble the next wave of market trend coming up, open up the new frontier of technology innovation and support the whole value chain exchange opportunities to all the industry elites.

I, on behalf of China Energy and Environmental Technology Association, wish to extend my warmest congratulations to this upcoming high-profile event for what will be a most rewarding and compelling event in automotive industry.

ZHU Hongyu
Secretary General
China Energy and Environmental Technology Association
